Natural System Error Messages NAT5501-NAT5550

NAT5502: SYSQL error.

Text	ESY5502 SYSQL Error.
Expl.	internal ESY Error.
Actn.	Please contact SAG Support.

NAT5503: RECALL error

Text	ESY5503 RECALL error.
Expl.	dataset could not be recalled using ARCHRCAL macro; check if data-set is really migrated; if yes,contact system-programmer regarding the installed migration tool.
Actn.	check dataset status and/or migration tool with system programmer.

NAT5506: Data set is migrated.

Text	ESY5506 Data set is migrated.
Expl.	DS is archived on external storage media.
Actn.	Please use startup parameter RECALL in ESY.

NAT5507: Too many parallel ESY requests.

Text	ESY5507 Too many parallel ESY requests.
Expl.	You may only use 5 nested loops in ESY.
Actn.	Please check programs and correct error.

NAT5508: ADABAS response code :1: returned from ESY.

Text	ESY5508 ADABAS response code :1: returned from ESY.
Expl.	ADABAS Rsp :1: return from ESY.
Actn.	Please contact your database administrator.

NAT5509: Logon failed - check LOGON-ID / PASSWORD.

Text	ESY5509 Logon failed - check LOGON-ID / PASSWORD.
Expl.	The attempted logon failed. Note: A more detailed message is returned by the installed security system when the ERROR-TEXT field is specified.
Actn.	Try to logon again, using a valid LOGON-ID and PASSWORD.

NAT5510: Logon required.

Text	ESY5510 Logon required.
Actn.	Logon to NATURAL PROCESS (view NATPROC-LOGON).

NAT5511: Function must be LOGON/LOGOFF.

Text	ESY5511 Function must be LOGON/LOGOFF.
Expl.	An invalid function was given in view NATPROC-LOGON.
Actn.	Check source program, valid functions are LOGON and LOGOFF.

NAT5520: No core available.

Text	ESY5520 No core available.
Expl.	The amount of core required for each user is: MAXFBL + MAXSBL + MAXCBL + (NUMREQ * BUFLEN)
Actn.	Increase the auxilliary buffer size (ASIZE parameter).

NAT5521: NATPNI/NATPNIP unresolved.

Text	ESY5521 NATPNI/NATPNIP unresolved.
Expl.	This NATURAL nucleus is unable to perform NATURAL PROCESS functions.
Actn.	Contact the NATURAL Administrator.

NAT5530: Access denied by Security facility.

Text	ESY5530 Access denied by Security facility.
Expl.	A security violation has occurred. This return code has been issued by the security system with which NATURAL PROCESS interfaces.
Actn.	No action is required.

NAT5531: Password missing or incorrect.

Text	ESY5531 Password missing or incorrect.
Expl.	The data set is password protected, i.e. a password must be supplied.
Actn.	Enter a valid password.

NAT5532: :1: limit specified - ACCEPT NO LIMITS.

NAT5533: Requested number of records scanned.

Text	ESY5533 Requested number of records scanned.
Expl.	Requested number of records in READ-FILE or READ-SPOOL scanned and no match for search-creteria found.
Actn.	no action required

NAT5534: File is not a load library.

Text	ESY5534 File is not a load library

NAT5535: File has invalid format.

Text	ESY5535 File has invalid format.
Expl.	File has not supported DSORG.
Actn.	check with the system programmer.

NAT5536: CVA error :1: accessing VTOC.

Text	ESY5536 CVA error :1: accessing VTOC.
Expl.	Macro CVAFDIR caused error.
Actn.	Check inline error code with the system programmer.

NAT5537: Time limit reached.

Text	ESY5537 Time limit reached.
Expl.	time limit reached and no record was found for this search criteria.
Actn.	check inline error code with the system programmer.

NAT5538: Invalid record-length specified.

Text	ESY5538 Invalid record-length specified.

NAT5539: DFHSMREQ failed with RC = :1:.

Text	DFHSMREQ failed with RC = :1:
Expl.	A request failed to delete a migrated data set.
Actn.	Contact your storage administrator.

NAT5544: Invalid File-ID.

Text	ESY5544 Invalid File-ID.
Expl.	The requested file-id does not exist.
Actn.	Specify valid file-id.

NAT5550: Not a PDS or LIBRARIAN file or VSAM data set.

Text	ESY5550 Not a partitioned data set or LIBRARIAN file.
Expl.	An attempt was made to access the directory of a non-PDS file.
Actn.	No action is required.
